

# Where Might the Mighty MadBum Move?

Evan Howard

2023-04-20

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
## -- Player ID Lookup from the Chadwick Bureau's public register of baseball playe
```

```
## i Data updated: 2023-04-20 16:17:41 PDT
```

```
## # A tibble: 1 x 11
##   first_name last_name given_name name_suffix nick_name birth_year
##   <chr>      <chr>      <chr>      <chr>      <chr>      <int>
## 1 Madison    Bumgarner Madison Kyle ""          ""          1989
## # i 5 more variables: mlb_played_first <int>, mlbam_id <int>,
## #   retrosheet_id <chr>, bbref_id <chr>, fangraphs_id <int>
```

Player	Season	W	L	WLpct	ERA	G	IP	H	R	ER	HR	BB	SO	Kper9	BBper9	Kper9	KBBratio	
Madison Bumgarner	2022	7	15	0.318	4.94	30	156.8	179	97	86	25	49	112	6.4	2.8	10.3	2.3	0.156

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
